

Release Note

Discovery Tool V0.30

Document ID:	20180911ASI2
Software name:	Discovery Tool V0.30
Released:	11th Sep 2018
Release Tag:	discover_v0030_20180911
Package name:	Discover_v0029_20180911.zip
Platform requirements:	This package contains a tool to “discover” Barix devices within a local environment. It is implemented in Java, requiring Java Standard Edition 5 or later. As the application has a GUI, the X-Window system is required when running on Linux/FreeBSD and other *NIX systems.

1 Hardware Compatibility

This Software is intended to run on all PC environments for which Java Edition 5 JRE or later is supported. For Edition 5 the support for the “start browser” feature is more specifically targeted at the following operating systems:

- Mac OS X
- GNU/Linux
- Unix
- Windows XP/Vista/7/10

2 New Features

The following new features have been implemented in the Discovery Tool V0.30 (since version 0.29):

Product ID (SNMP System ID) changes:

- Added IPAM400 DevKit Product (17491.1.154)

3 Bugs Fixed In This Version

None

4 Known Issues

None.

5 Major Modifications

None.
